

The Aggtown Almanac

State of the league after Weeks 1 to 4 · 2026 season · checked against every game since 2015

A month in, the defending champion is 0-4. In eleven seasons and 987 games of Aggtown history, nine teams have started 0-4, and not one of them made the playoffs. The team sitting at 4-0 finished last season 11th with the worst four-week start this league has ever seen. Eight teams have started 4-0 before: all eight made the playoffs, and none of them won it. This is the first issue with the whole archive behind it, Yahoo years included, and the archive has opinions.

The standings, and what history says about them

Record is what happened. All-play (your record if you played all eleven opponents every week) is what should have happened. The last column is new: of every team since 2015 that started the season with the same record, how many made the playoffs.

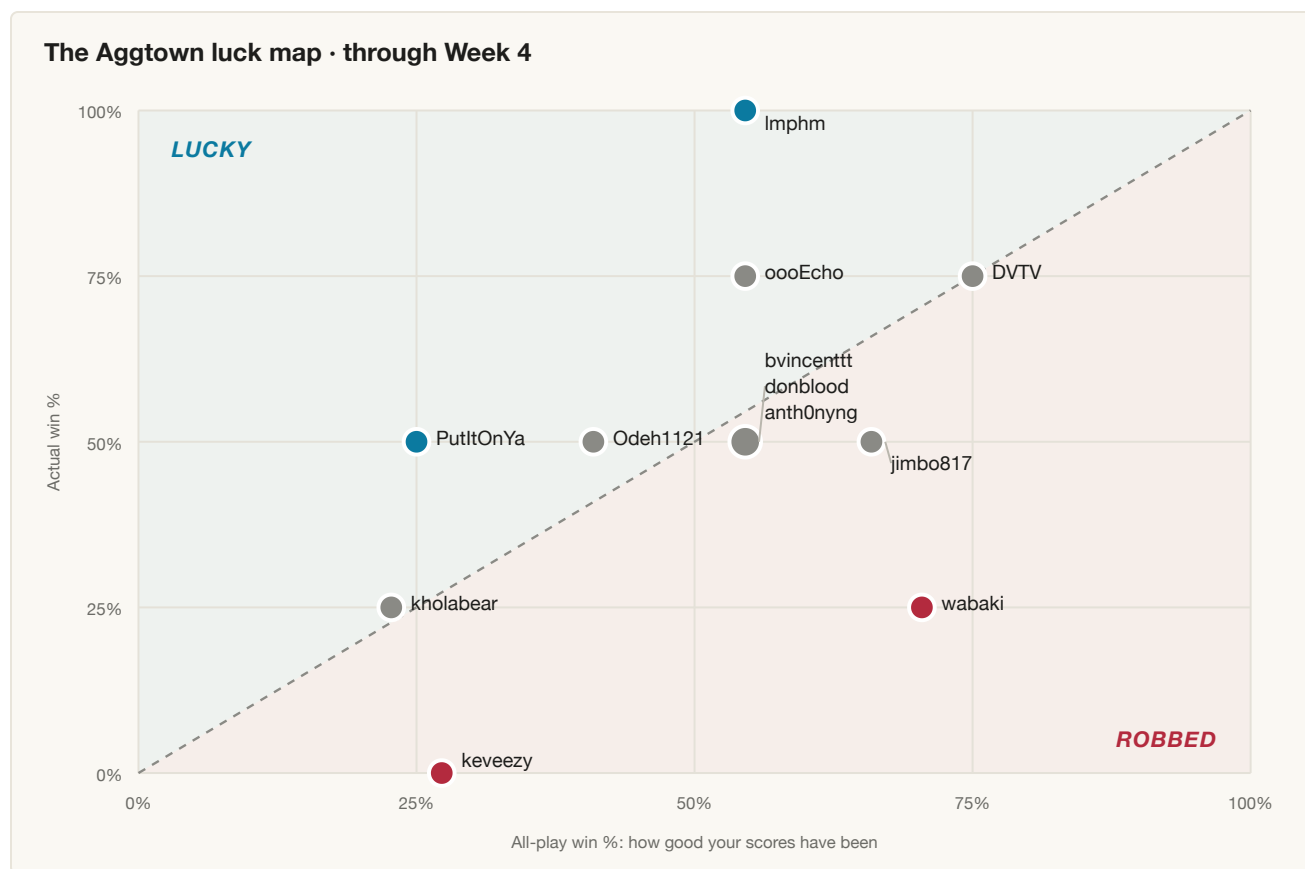

Aggtown through Week 4 · sorted by record, then points

Team	Rec	PF	PA	All-play	Luck	Same start made playoffs
Imphm	4-0	510.06	397.54	24-20	lucky	8 of 8
DVTV	3-1	536.28	452.74	33-11	fair	31 of 35
oooEcho	3-1	492.52	465.50	24-20	fair	31 of 35
bvincenttt	2-2	511.60	450.00	24-20	fair	30 of 45
jimbo817	2-2	506.08	505.26	29-15	fair	30 of 45
donblood	2-2	504.10	553.16	24-20	fair	30 of 45
anth0nyng	2-2	485.64	524.84	24-20	fair	30 of 45
Odeh1121	2-2	463.80	495.74	18-26	fair	30 of 45
PutItOnYa	2-2	406.16	406.48	11-33	lucky	30 of 45
wabaki	1-3	544.50	482.86	31-13	robbed	11 of 33
kholabear	1-3	395.08	491.34	10-34	fair	11 of 33
keveezy	0-4	416.72	547.08	12-32	robbed	0 of 9

Read the last column top to bottom and it is basically the season in one stroke. A 3-1 start has made the playoffs 31 times in 35 tries. A 1-3 start, 11 in 33. And 0-4 has never once worked.

The luck map

Every team by how good it has actually been (all-play) versus what the scoreboard gave it. Above the line you're a thief. Below it, you've been robbed.

Imphm sits alone at the top: 4-0 on a 24-20 all-play, nearly two full wins above what the scores earned. **wabaki is the exact mirror**, 1-3 on a 31-13 all-play, nearly two wins short. They are the two most extreme dots on the map, they finished 11th and 12th last season, and they play each other this week.

Four weeks, eleven years of precedent

The old Almanac only knew three Sleeper seasons. Now we can ask the real question: when a team has looked like this after four weeks, what happened next?

THE 4-0 CEILING · lmphm

8 of 8

Every 4-0 start has made the playoffs. None has won the title.

Best finish by a 4-0 team in league history is 4th, and it was lmphm's own 2022 team, which started 4-0 on this exact 24-20 all-play, went 12-2, and finished 4th. That is the tied-worst all-play of any 4-0 start ever, so the mirage talk is fair, but so is the precedent: the last time lmphm looked this lucky, the luck held all the way to the top seed. The bigger story is the swing. A year ago lmphm opened 0-4 with a **3-41 all-play, the worst four-week start in league history**, and finished 11th. Now **Ja'Marr Chase and Keenan Allen are both Out**, and Josh Allen (115.46) is carrying the whole thing.

THE 0-4 FLOOR · keveezy

0 of 9

No 0-4 team has ever made the playoffs here. Three finished last.

Nine teams have started 0-4. The best any of them finished was 7th (ramzz, 2022). Add the champion's curse: nobody has ever repeated, and the best a defending champ has done the following year is 3rd (DVTV, 2020). keveezy's own 2021 title defense ended 8th. This one has a twist of the knife: the Week 1 loss to kholabear was by 3.06 points with Jacory Croskey-Merritt (12.60) on the bench and Rico Dowdle (4.10) in the lineup. One lineup call from 1-3. Instead it's 0-4, a 12-32 all-play, and **Saquon Barkley Out**.

THE ROBBED · wabaki

31-13

The second-best all-play of any 1-3 start in 33 tries.

The precedent is a coin with two very different faces. anth0nyng started 1-3 on a 29-15 all-play in 2023 and **won the title**. donblood started 1-3 on 32-12 last year and finished 3-11. jimbo817 in 2015: 27-9 all-play, 2-11 final. The difference is usually whether the losses keep coming down to coin flips, and wabaki's have not been coin flips. Two of the three were decided by one lineup call each (see Coach ratings). The most efficient lineup-setter in the league is 1-3 because of two decisions that cost 21 points combined.

And one more for the 3-1 crowd: DVTV's 33-11 all-play is the third-best of the 35 teams who have started 3-1, and 31 of those 35 made the playoffs. The old Almanac said DVTV had never won this league. With the Yahoo years in, that's wrong: **DVTV won it in 2017 and 2019**, and is tied with keveezy for the most titles in league history.

Power rankings

True strength (all-play, then points), with movement since last issue.

- 1 -0 **DVTV** · Still the best team on paper after a Week 4 loss to PutItOnYa and their 11-33 all-play. 33-11 all-play, second in points (536.28), Derrick Henry (90.80) rolling. The cloud is the receiver room: **McConkey and Coker Out, Tee Higgins Questionable**. Two titles, but none since 2019 and only one finish better than 6th since.

- 2 ▲2 **wabaki** · The biggest riser and the angriest team in the league. **Most points scored (544.50)**, a 31-13 all-play, and a 1-3 record. Kenneth Walker (110.10) is carrying the backfield, and the \$0 waiver pickup Brock Purdy has started for 79.38 points. Last place a year ago.

- 3 ▼1 **jimbo817** · 29-15 against the field, 2-2 on the board. Gibbs (116.00) is a monster. **Caleb Williams and Terry McLaurin both Out** is the worry. Career footnote nobody asked for: jimbo817 is 73-97 all-time and three losses from becoming the first manager to 100.

- 4 ▼1 **bvincenttt** · 2-2, and should be 3-1. The Week 1 loss to donblood was by 1.74 points with Jordan Addison (0.00) in the lineup and Chuba Hubbard (23.70) on the bench. **JSN is the league's top-scoring player (116.66)**. The 2024 champion is fine.

- 5 ▲3 **lmpm** · 4-0, and the record is still the only elite thing about it: a 24-20 all-play, luckiest team in the league by a mile. Josh Allen (115.46) is doing it alone with **Chase and Keenan Allen Out**. Precedent says playoffs. Precedent also says no 4-0 team has ever finished the job.

- 6 -0 **donblood** · 2-2, a 24-20 all-play, Bijan (105.40) and Davante (73.00) producing. The issue is the bench: **134.96 points left on it, the most in the league by more than 50**, including two starting quarterbacks (Mahomes, Dak) where only one can play.

- 7 ▼2 **oooEcho** · 3-1 on a 24-20 all-play, CeeDee Lamb (112.20) carrying through an injury pileup (**Etienne on IR**). Thirty-one of 35 3-1 starts have made it. For a manager with three last-place finishes and two playoff trips in nine seasons, that is the best news in years.

- 8 ▼1 **anth0nyng** · 2-2, clawing back from the Achane injury (**IR**), with **Breece Hall now Out** too. Most points in a loss this season (133.30, Week 1). Tied for the most career wins in league history at 95.

- 9 ▲2 **Odeh1121** · Exploded for 161.58 in Week 4 behind Tetairoa McMillan's 45.20, the top single-game performance of the season. But **Jayden Daniels Out, A.J. Brown on IR, Rachaad White Out**. Last year's 12-2 top seed is 2-2 with an 18-26 all-play.

- 10 ▼1 **keveezy** · The champ, 0-4, last place. Elite receivers (Amon-Ra, 91.30), a backfield in the morgue (**Saquon Out, Dowdle Out**), and a 76.68 in Week 4 that became the biggest beatdown of the season. History says the playoffs are gone. The sim agrees (1.1%).

- 11 ▲1 **PutItOnYa** · 2-2 on an 11-33 all-play: **the worst all-play of any 2-2 start in league history**. The funny part is that PutItOnYa has done this before: the 2020 team started with a 12-32 all-play and went 11-2. Kyren (89.70) is the one bright spot.

- 12 ▼2 **kholabear** · 1-3, fewest points in the league (395.08), the season's lowest score (71.34 in Week 3), and an injury report that reads like a horror show: **Jefferson, DeVonta Smith and Goedert Out, Jordan Mason on IR, Lamar Questionable**.

Matchup of the week

DVTV (3-1) vs donblood (2-2)

The best team in the league by all-play (33-11, #1 in power) against the team leaving the most on its bench (134.96 points, #6 in power). The model makes DVTV a 59.6% favorite, the title favorite against a roster that could be scary if it ever started the right quarterback.

History is firmly on the other side. **donblood leads the series 8-4** and has outscored DVTV by about ten points a game across those twelve meetings (123.09 to 113.11). DVTV won the last one, 128.80 to 80.84 in Week 7 last year. DVTV needs Tee Higgins (Questionable) and a healthy Derrick Henry; donblood needs Bijan, and a lineup card filled out by someone who has looked at the bench.

Series: donblood leads 8-4 · no playoff meetings · DVTV won the last one

The grudge match: lmphm (4-0) vs wabaki (1-3), the luck map's two polar opposites and last season's 11th- and 12th-place teams. All-play makes wabaki a 59% favorite. The old Almanac called this series 1-0; with the archive, **lmphm leads 7-1**, has won four straight, and won their one playoff meeting (Week 16, 2017, 111.40 to 65.16). If regression is ever going to arrive for lmphm, it has to beat a decade of habit, and it gets help: no Ja'Marr Chase.

Elsewhere: keveezy (0-4) gets jimbo817 (2-2) in a dead-even 8-8 series with real scar tissue: keveezy beat jimbo817 in the 2020 title game (161.38 to 144.34), has won three straight, and is 2-1 against jimbo817 in the playoffs. oooEcho (3-1) draws PutItOnYa, who leads that series 5-2 and has won four in a row.

The hardware

HIGH SCORE OF THE SEASON

wabaki, 161.62 (Week 4), four hundredths ahead of Odeh1121's 161.58 the same week. For perspective it ranks about 110th of 1,974 scores in league history; the record is still jimbo817's 222.66 from 2019, set when passing touchdowns were worth five.

LOW SCORE OF THE SEASON

kholabear, 71.34 in Week 3, a loss to PutItOnYa's 105.20. Not the champ's 76.68, which the old Almanac had wrong.

BIGGEST BLOWOUT

wabaki 161.62, keveezy 76.68 (Week 4). An 84.94-point beatdown, the 11th-largest margin in 987 games of league history, delivered to the defending champ.

MOST POINTS IN A LOSS

anth0nyng, Week 1: 133.30 and still lost to oooEcho's 142.92. wabaki's 130.98 in Week 3 is a close second.

CLOSEST GAME

donblood 119.80, bvincenttt 118.06 (Week 1). Decided by 1.74, with 23.70 points of Chuba Hubbard on bvincenttt's bench.

DRAFT STEAL / BUST

Steal: Patrick Mahomes, pick 122 (donblood), 85.58 points, when donblood actually starts him. Bust: A.J. Brown, pick 21 (Odeh1121), 5.60 points, now on IR.

TOP PERFORMANCE

Tetairoa McMillan, 45.20 (Odeh1121, Week 4). JSN's 42.50 (bvincenttt, Week 2) and Gibbs's 41.40 (jimbo817, Week 3) round out the podium.

Coach ratings

Efficiency is points scored divided by the best lineup possible from the same roster each week. Benched is the gap. Higher efficiency is better.

#	Manager	Efficiency	Benched	Verdict
1	wabaki	95.4%	26.32	Sharpest in the league, and two calls still cost two games
2	lmpm	91.6%	46.72	Sharp
3	anth0nyng	91.5%	45.40	Sharp
4	oooEcho	91.4%	46.10	Sharp
5	bvincenttt	88.5%	66.39	One call cost Week 1
6	DVTV	87.4%	77.40	Winning in spite of itself
7	jimbo817	87.2%	74.26	Slipping
8	Odeh1121	85.7%	77.20	Sloppy

#	Manager	Efficiency	Bench	Verdict
9	PutItOnYa	84.3%	75.44	Sloppy
10	keveezy	83.8%	80.50	One call cost Week 1; the 0-4 could be 1-3
11	kholabear	83.8%	76.40	Sloppy, and short on healthy bodies
12	donblood	78.9%	134.96	A full starter on the pine, every week

The lineup calls that flipped results. Four games this season were lost by less than the gap between a benched player and the starter he could have replaced: bvincentttt in Week 1 (Hubbard 23.70 over Addison 0.00, lost by 1.74), wabaki in Week 1 (Diggs 15.50 over Quentin Johnston 3.70, lost by 9.24), wabaki again in Week 3 (Zay Flowers 15.40 over Dalton Schultz 6.00, lost by 6.18), and keveezy in Week 1 (Croskey-Merritt 12.60 over Dowdle 4.10, lost by 3.06). In a world of perfect lineups, wabaki and bvincentttt are 3-1 and kholabear is 0-4.

The punishment standings

This year's stakes for dead last: panhandle in public with an "I SUCK AT FANTASY FOOTBALL" sign until you've honestly earned \$50, or one full day at a bar, open to close. Four weeks in, the cellar reads:

- **Holding the sign: keveezy** (12th, 0-4). The reigning champion. No defending champ has ever finished last the following year; the worst was kholabear's 9th in 2019. Three of the nine previous 0-4 teams finished dead last.
- **kholabear** (11th, 1-3) is the real long-term threat: lowest scoring in the league, a 10-34 all-play, and a receiver room that is entirely hurt. There is a lifeline in the archive, though: DVTV started 1-3 on a 10-34 all-play in 2020 and finished 3rd.
- **PutItOnYa** (improbably safe at 2-2), the worst team by all-play, insulated only by a schedule that keeps handing out wins.
- **Sign history:** oooEcho has finished last three times (2018, 2020, 2021), the most in league history. wabaki holds the title from 2025, and lmphm was one spot above. lmphm is now in first. wabaki, with the most points in the league, is 10th and two spots from the sign again.

Rivalry spotlight & milestone watch

- **The archive rewrote the champ's rivalry.** The old Almanac had bvincentttt 4-0 all-time against keveezy. That was Sleeper only. With Yahoo, **keveezy actually leads 7-6**; bvincentttt has simply won the last four.
- **The race to 100 wins is a dead heat.** anth0nyng and lmphm are tied for the most career wins at 95, five each from triple digits. keveezy (90) and bvincentttt (89) are next.
- **The scoring crown isn't close anymore.** anth0nyng leads all-time with 21,675.52 points, about 800 clear of keveezy (20,873.00) and donblood (20,784.24).
- **The record nobody wants:** jimbo817 has 97 career losses and is three away from 100. The worst career win rate belongs to oooEcho (.420), just behind jimbo817 (.429).
- **Most lopsided active rivalries:** wabaki is 10-2 against keveezy, but 1-7 against both DVTV and lmphm. lmphm is 10-3 against jimbo817. And the most-played series in league history, bvincentttt vs lmphm, is a perfect 10-10, with a 2-2 split in the playoffs.

Playoff & title odds

Four thousand simulated rest-of-seasons from current records: the live Almanac's own simulation, same seed, so these are the numbers on the site. Six of twelve make it. Ten weeks to go.

Team	Rec	PF/g	Playoffs	1 seed	Title
DVTV	3-1	134.07	92.1%	30.8%	24.5%
lmphm	4-0	127.52	91.7%	32.1%	16.4%
wabaki	1-3	136.12	61.6%	5.4%	13.9%
jimbo817	2-2	126.52	66.1%	7.1%	10.1%
oooEcho	3-1	123.13	70.2%	9.8%	9.7%
bvincentttt	2-2	127.90	62.6%	5.3%	8.7%
donblood	2-2	126.03	57.3%	4.8%	7.9%
anth0nyng	2-2	121.41	52.5%	3.5%	5.7%
Odeh1121	2-2	115.95	32.3%	1.2%	2.6%
PutItOnYa	2-2	101.54	10.3%	0.1%	0.4%
kholabear	1-3	98.77	2.3%	0%	0.1%
keveezy	0-4	104.18	1.1%	0%	0.1%

The painful truth for the champ: 0-4 drops you to a 1.1% playoff shot even with a roster this talented, and history says even that is generous. Meanwhile **wabaki at 1-3 is a 62% bet to make it** and third in title odds. The scoreboard has lied about both of them, and the sim knows it.

Odds & ends

- **Still zero trades.** Four weeks, a dozen lopsided rosters, not one deal. The Week 11 deadline is the only clock. donblood has a spare starting quarterback; kholabear needs anyone who can catch.
- **anth0nyng remains the FAAB king** (\$60 spent). donblood, kholabear and PutItOnYa still haven't spent a dime. The best pickup cost nothing: wabaki's Brock Purdy, 79.38 started points for \$0. DVTV's \$38 on Tyler Shough has returned 63.12.
- **Bench crime of the month:** donblood left Isaiah Likely's 27.80 on the bench in Week 1 and started Colston Loveland, who scored zero. donblood won anyway, by 1.74, which tells you everything about Week 1.

lmphm has precedent on their side and a receiver room in the trainer's office. wabaki has the numbers and a 1-7 history against this week's opponent. And the champion is 0-4 in a league where nobody has ever come back from 0-4. Regression is coming for somebody. History says it rarely picks the champ's side.

Records, lineups, injuries, draft picks, FAAB and every weekly result pulled live from Sleeper through Week 4 (injury designations as of Oct 6). History from the combined Yahoo (2015 to 2022) and Sleeper (2023 to 2025) archive: 11 seasons, 987 games, consolation games excluded. Passing TDs were worth 5 points through 2021, so compare old scores loosely. Power-ranking movement is measured against last issue. Odds from the live Almanac's 4,000 simulated rest-of-seasons, a forecast, not a promise.
