

The Sober Gang Almanac

State of the league after Weeks 1 to 4 · 2026 season · checked against every game since 2019

Last year's last-place team is in first. The defending champion is 1-3. The best team in the league by every measure except the one that counts is 2-2, and in seven seasons no 2-2 team has ever won this thing. Four teams sit at 3-1, which matters more than it sounds: five of the seven Sober Gang champions started exactly 3-1. This is the first issue with the whole archive behind it, the Nooblets years on Yahoo included, and the archive has opinions.

The standings, and what history says about them

Record is what happened. All-play (your record if you played all nine opponents every week) is what should have happened. The last column is new: of every team since 2019 that started with the same record, how many made the playoffs.

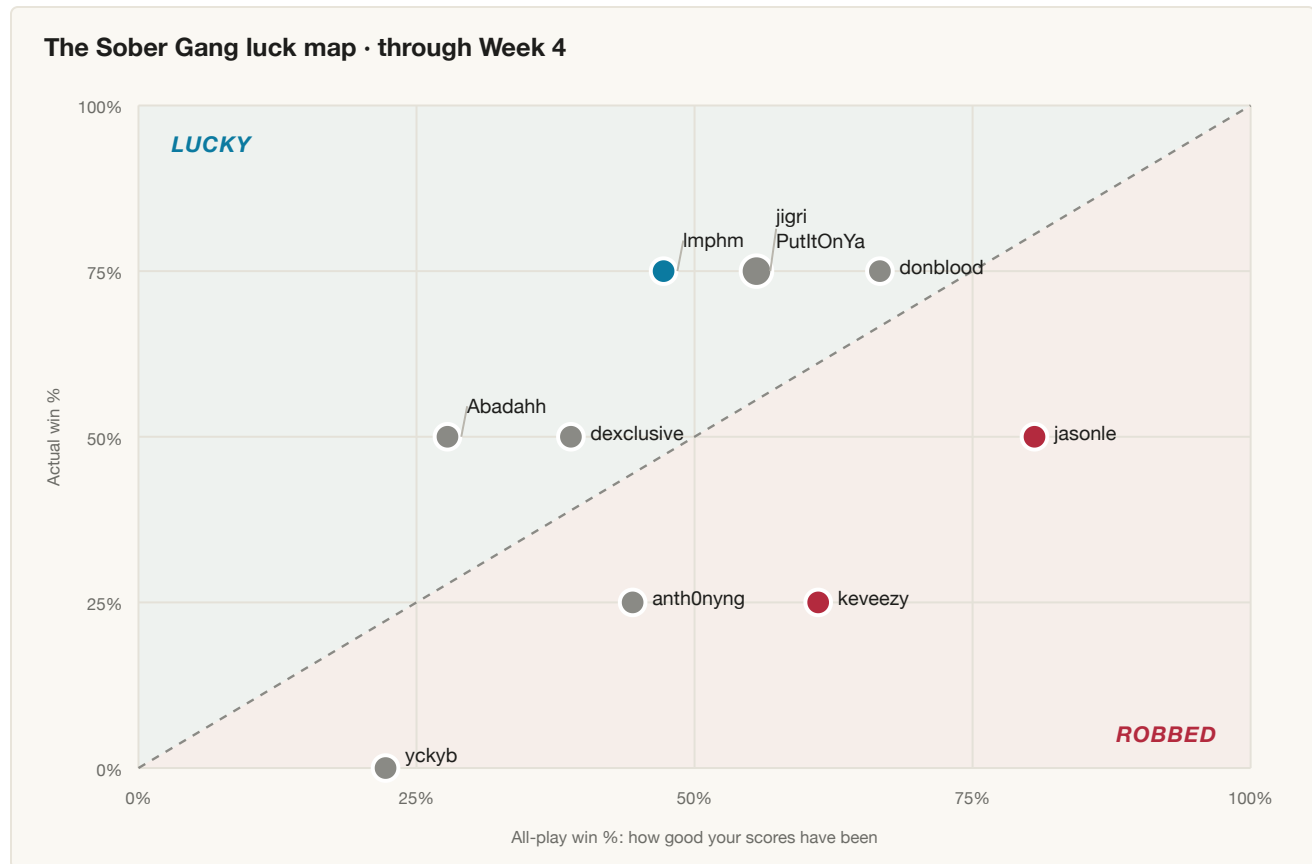

Sober Gang through Week 4 · sorted by record, then points

Team	Rec	PF	PA	All-play	Luck	Same start made playoffs
donblood	3-1	566.70	545.88	24-12	fair	12 of 16
jigri	3-1	534.28	493.88	20-16	fair	12 of 16
PutItOnYa	3-1	533.62	483.30	20-16	fair	12 of 16
Imphm	3-1	520.76	462.20	17-19	lucky	12 of 16
jasonle	2-2	591.78	575.32	29-7	robbed	15 of 25
dexclusive	2-2	474.50	470.56	14-22	fair	15 of 25
Abadahh	2-2	419.48	482.78	10-26	fair	15 of 25
keveezy	1-3	532.98	547.66	22-14	robbed	9 of 18
anth0nyng	1-3	488.78	517.78	16-20	fair	9 of 18
yckyb	0-4	412.88	496.40	8-28	fair	0 of 5

A 3-1 start has made the playoffs 12 times in 16 tries and produced five champions. A 2-2 start has made it 15 of 25 times and produced none. And 0-4 is 0 for 5.

The luck map

Every team by how good it has actually been (all-play) versus what the scoreboard gave it. Above the line you're a thief. Below it, you've been robbed.

jasonle is stranded in the robbed corner: a 29-7 all-play, the most points in the league, and a .500 record. **keveezy is right behind,** 1-3 on a winning 22-14 all-play. Up top, **Imphm is 3-1 on a losing all-play,** and if that sounds familiar it's because Imphm is also the luckiest team in Aggtown. Two leagues, one horseshoe.

Four weeks, seven years of precedent

Sober Gang's Sleeper history only starts in 2024. With the Nooblets years added, we can ask the real question: when a team has looked like this after four weeks, what happened next?

WORST TO FIRST · donblood

182.10

Last place in 2025. First place now, and it isn't a fluke.

donblood finished 10th of 10 last year at 5-9. This year's team opened with **182.10 in Week 1, the sixth-highest score in league history** (of 1,058), and hasn't let up: 3-1, a 24-12 all-play, CeeDee Lamb (112.20) and Derrick Henry (90.80) both rolling. The two previous teams to start 3-1 on a 24-12 all-play were keveezy in 2019 and anth0nyng in 2025. Both won the title. The worry is the receiver room: **McConkey and Coker Out.**

THE ROBBED · jasonle

29-7

The best all-play of any 2-2 start in league history.

591.78 points, most in the league. Losses to the sixth-highest score ever (donblood's 182.10, while jasonle put up 155.46, the most in a loss this season) and to Abadahh by **half a point** in Week 3, with Michael Wilson's 25.90 on the bench and Tetairoa McMillan's 3.70 in the lineup. The sim makes jasonle the title favorite. History adds two footnotes: no 2-2 team has ever won Sober Gang, and jasonle's own 2025 team started 2-2 on a 24-12 all-play and finished 4-10.

THE OTHER ROBBED · keveezy

22-14

The best all-play of any 1-3 start in league history.

Eighteen teams have started 1-3 here. Nine made the playoffs, and jigri won the whole thing from 1-3 in 2024. keveezy has scored 532.98, as many as 3-1 jigri (534.28) and PutItOnYa (533.62), and lost the opener by 13.36 with Chuba Hubbard (23.70) on the bench behind Saquon Barkley (9.00), who is now **Out**. The sim gives keveezy a 62% playoff shot. History says that's about right.

And the 0-4 floor: ykyb is the sixth team to start 0-4. None of the first five made the playoffs. The defending champion, anth0nyng, is 1-3 on a 16-20 all-play, and no Sober Gang champion has ever repeated. The best title defense so far is 2nd (PutItOnYa in 2024, jigri in 2025). anth0nyng's previous defense, in 2022, ended 9th.

Power rankings

True strength (all-play, then points), with movement since last issue.

- 1** ▲1 **jasonle** · The best team in the league, at .500. Gibbs (116.00), Kenneth Walker (110.10) and McMillan (74.50) make the deepest core here, and 591.78 points is 25 clear of anyone. **A.J. Brown on IR** after five points as a second-round pick is the only real scar. The 2022 champion.

-
- 2 ▼1 donblood** · 3-1, second in points, 24-12 all-play, and a week-one score for the history books. **McConkey and Coker Out, Kamara Questionable, Jordan Mason on IR**, so the depth will get tested. donblood has never won Sober Gang (runner-up in 2020).
-
- 3 ▲2 keveezy** · The riser. 1-3 with a winning all-play, Amon-Ra (91.30) and Chris Olave (90.10) producing, and Patrick Mahomes (a 12th-round pick) giving real value. **Saquon is Out**. The 2019 champion, but last place as recently as 2024.
-
- 4 ▼1 jigri** · 3-1 on a 20-16 all-play. JSN (116.66) is the top-scoring player in the league. The 3-1 start could be 4-0 if Jared Goff (29.78, a 15th-round steal) had started over Trevor Lawrence (7.16) in a 4.16-point loss to lpmh. **Justin Jefferson Out**. Two titles and last year's runner-up.
-
- 5 ▲1 PutItOnYa** · 3-1, the sharpest lineup-setter in the league (94.7% efficiency), Bijan (105.40) and Kyren (89.70) doing the work. The one loss was by 0.28 points to jigri. **Etienne on IR**. The career wins leader in this league.
-
- 6 ▼2 lpmh** · 3-1 on a 17-19 all-play: 15th of the 16 teams who've started 3-1 by all-play. The closest comp is jigri in 2020 (3-1 on 17-19), who won the title, so don't laugh too hard. Josh Allen (115.46) is the engine; **DeVonta Smith and Terry McLaurin are Out**, and first-round pick Puka Nacua has 40.10 points.
-
- 7 -0 anthOnyng** · The defending champion, 1-3 on a 16-20 all-play. Opened the season with the year's worst beating (46.16 points, to lpmh) and hasn't found a rhythm since. McCaffrey (74.00) and Davante Adams (73.00) are fine; **Rashee Rice is Questionable**. The most active manager on the wire (9 adds).
-
- 8 ▲1 dexclusive** · 2-2, and by lineup alone should be 3-1 or better: lost Week 2 by 1.28 with Stefon Diggs (21.70) benched for DJ Moore (-0.10), and Week 3 with Brock Bowers (27.60) benched for Dalton Schultz (6.00). Biggest FAAB spender (\$45), best free pickup (Bryce Young, 60.18 started points). **Goedert, Keenan Allen and Rachaad White Out; Tee Higgins Questionable**.
-
- 9 ▼1 Abadahh** · 2-2 on a 10-26 all-play, tied for the worst all-play of any 2-2 start in league history. Wins by 7.00 over ykyb and 0.52 over jasonle are the whole story. **Ja'Marr Chase and Breece Hall Out, Jeremiyah Love Questionable**.
-
- 10 -0 ykyb** · 0-4, fewest points (412.88), an 8-28 all-play, and the most points left on the bench (102.96). Brock Purdy, a 15th-round pick, has the most points of any drafted player in the league (101.48). **Lamar Questionable, Achane on IR**.

Matchup of the week

jasonle (2-2) vs PutItOnYa (3-1)

The league's most robbed team against its most efficient one, and a title-game rematch. PutItOnYa leads the series 8-5, all of it built in the regular season. But the two playoff meetings both went to jasonle: the 2019 third-place game (134.82 to 110.66) and **the 2022 championship** (144.10 to 112.28).

The model makes jasonle a 64.5% favorite on scoring alone. PutItOnYa's answer has been to start the right players every single week and let the other team blink. Something has to give.

Series: PutItOnYa leads 8-5 · jasonle 2-0 in the playoffs, including the 2022 title game

Elsewhere: donblood (3-1) gets the defending champ anth0nyng (1-3), who leads the series 6-3, though donblood won their only playoff meeting. lmphm (3-1) draws winless ykyb, who leads that series 6-4 and has won the last two. And jigri vs dexclusive is dead even at 6-6, except in the playoffs, where dexclusive is 2-0.

The hardware

Coach ratings

Efficiency is points scored divided by the best lineup possible from the same roster each week. Benchd is the gap. Higher efficiency is better.

#	Manager	Efficiency	Benchd	Verdict
1	PutItOnYa	94.7%	29.80	Sharpest in the league
2	Abadahh	93.1%	31.10	Sharp, with less to choose from
3	donblood	90.8%	57.16	Good
4	lmphm	90.5%	54.98	Good
5	anth0nyng	90.0%	54.10	Fine
6	jasonle	87.6%	83.98	The half-point loss lives here
7	keveezy	87.0%	79.30	One call cost Week 1
8	jigri	86.0%	87.32	One call cost Week 2
9	dexclusive	85.6%	79.60	Two calls cost two games
10	ykyb	80.0%	102.96	One call cost Week 1; most points benchd

The lineup calls that flipped results. Six games this season were lost by less than the gap between a benchd player and the starter he could have replaced: ykyb in Week 1 (Isaiah Likely 27.80 over Colston Loveland 0.00, lost by 7.00), keveezy in Week 1 (Hubbard 23.70 over Saquon 9.00, lost by 13.36), jigri in Week 2 (Goff 29.78 over Lawrence 7.16, lost by 4.16), dexclusive in Weeks 2 and 3 (Diggs, then Bowers), and jasonle in Week 3 (Michael Wilson 25.90 over McMillan 3.70, lost by 0.52). In a world of perfect lineups, jigri is 4-0, lmphm is 1-3, and Abadahh is 0-4.

The cellar

Four weeks in, the bottom of the table reads:

- **ykyb** (10th, 0-4). Fewest points, the worst all-play, and the history of 0-4 starts says 0 for 5. ykyb has finished last twice already (2021, 2022), tied for the most in league history.
- **anth0nyng** (9th, 1-3), the defending champion, with a 27% playoff shot and a 16-20 all-play. The worst title defense in league history is 9th, and it was anth0nyng's last one.
- **Abadahh** (improbably 2-2), the second-worst team by all-play, insulated by two wins by a combined 7.52 points. Last place in 2020 and 2023.
- **Last year's last-place finisher:** donblood, now in first. The cellar is not destiny.

Rivalry spotlight & milestone watch

- **The scoring crown is a photo finish.** anth0nyng leads all-time with 14,214.60 points. jigri has 14,198.98. That is **15.62 points across seven seasons**, one decent quarter. It could flip this week.
- **Most career wins:** PutItOnYa (68-45, .602), then jigri (65) and anth0nyng (64). jigri and anth0nyng also share the title lead with two each.
- **The most-played rivalry** is anth0nyng vs jigri: 17 games, jigri leads 9-8, and they've split four playoff meetings 2-2.
- **Most lopsided:** jigri is 10-1 against Abadahh and has won six straight. PutItOnYa is 11-3 against Abadahh (eight straight) and 10-2 against yckyb. dexclusive is 8-2 against keveezy, and anth0nyng is 10-3 against lmphm.
- **The record nobody wants:** Abadahh has 66 career losses and a .371 win rate, both the worst in league history.

Playoff & title odds

Four thousand simulated rest-of-seasons from current records: the live Almanac's own simulation, same seed, so these are the numbers on the site. Six of ten make it. Ten weeks to go.

Team	Rec	PF/g	Playoffs	1 seed	Title
jasonle	2-2	147.94	94.3%	27.4%	30.3%
donblood	3-1	141.68	96.3%	31.6%	23.4%
jigri	3-1	133.57	91.3%	14.5%	12.8%
PutItOnYa	3-1	133.40	88.3%	13%	12.1%
lmphm	3-1	130.19	86.5%	10.3%	9.4%
keveezy	1-3	133.25	62%	2.1%	7.8%
dexclusive	2-2	118.62	38.4%	0.7%	2.6%
anth0nyng	1-3	122.20	26.9%	0.3%	1.4%
Abadahh	2-2	104.87	14.7%	0.2%	0.4%
yckyb	0-4	103.22	1.4%	0%	0.1%

The sim and the standings disagree about who's best: **jasonle at 2-2 is the title favorite at 30%**, ahead of all four 3-1 teams. And keveezy at 1-3 is a 62% bet to make the playoffs, better than anth0nyng, dexclusive or Abadahh. Five of ten teams are above 85%, so the real race is for the sixth spot.

Odds & ends

- **Still zero trades.** Four weeks in, not one deal. The Week 11 deadline is the only clock.
- **dexclusive leads the FAAB spending** (\$45), with keveezy (\$35) next. donblood, PutItOnYa, Imphm and Abadahh still haven't spent a dime. The best pickup was free: dexclusive's Bryce Young, 60.18 started points.
- **Bench crime of the month:** jasonle's half-point loss in Week 3 with Michael Wilson's 25.90 on the bench. Honorable mention to ykyb, whose Week 1 starting tight end scored zero while Isaiah Likely put up 27.80 on the bench. That one was the difference between 0-4 and 1-3.

donblood went from last to first, jasonle is the best team at .500, and the defending champion is 1-3 in a league that has never had a repeat champion. Five of seven titles have gone to a team that started 3-1, and four teams are sitting there now. History says one of them is the champion. The scores say it might be jasonle anyway.
